Letter of Recommendation: Kurtis Durfey

To Whom It May Concern:

Even though Kurtis Durfey worked for me at UA Presents at the University of Arizona for a short time (budgetary cuts forced us to let him go), I can wholeheartedly express my utmost respect to his professional abilities, integrity, and dedication.

In no time, Kurtis managed to completely immerse himself in the marketing department, taking on duties that were both part of his job description and those that were not but needed attention. His creative work brought a complete new dimension to the organization with a fresh voice, impeccable taste and punctuality. Kurtis became an important, strong voice in the organization's designs, marketing strategies, and data analysis.

I was truly sorry to see him go, and I would HIGHLY recommend him for any position in the fields of design, marketing, data analysis or any related field. You and your company will be lucky to have him on board!

Please feel free to contact me should you wish to discuss it further.

Itzik Becher

Director of Programming and Development

UA Presents
